

9h30-10h45:

WELCOME

Mareike Trauerstein, Flavio Anselmetti, Univ. of Bern

KEYNOTE I

Addressing the challenge of understanding submarine landslides, earthquake & tsunami by IODP: Evolving perspectives from a student-trainee to a principle investigator, *Michael Strasser, Univ. of Innsbruck*

ONGOING 'SWISSDRILLING' PROJECTS I

South China Sea Rifted Margin: Initial results from IODP Exp. 367 and 368, *Anders McCarthy, Univ. of Lausanne*

Quest for eukaryotic signatures in the hot subseafloor sediments of the Nankai trough, *Lorenzo Lagostina, ETH Zürich*

Expedition 366: Mariana Convergent Margin and South Chamorro Seamount, *Philip Eickenbusch, ETH Zürich*

Serpentinization and life: An overview of IODP Exp. 357 drilling at the Atlantis Massif, *Gretchen Früh-Green, ETH Zürich*

10h45-11h15 Coffee

11h15-12h15:

KEYNOTE II

Current and Future Foci of ICDP, *Ulrich Harms, Head of Operational Support Group, International Continental Scientific Drilling Program*

ONGOING 'SWISSDRILLING' PROJECTS II

The Oman Drilling Project - exploring ancient seafloor in the Samail Ophiolite, *Gretchen Früh-Green, ETH Zürich*

DSeis: Drilling into seismogenic zones of M2.0 – M5.5 earthquakes in deep South African gold mines, *Martin Ziegler, Nico Berset, ETH Zürich*

Lake Towuti Drilling Project, *Marina Morlock, Univ. of Bern, Luis Gabriel Ordóñez Rendon, Univ. of Geneva*

12h15-13h30: Lunch

13h30-14h45:

FUTURE 'SWISSDRILLING' PROJECTS I

Fathoming the Messinian Salt Giant: Past and future steps en route to scheduling DREAM/MEDSALT drilling, *Judith McKenzie, ETH Zürich*

Gulf of Mexico deep methane cycling, *Mark Lever, ETH Zürich*

DIVE: Drilling the Ivrea Verbano zone: workshop discussions and perspectives, *Othmar Müntener; University of Lausanne*

Afar Dallol Drilling Project: stepping stones towards a unique sedimentary record in an active rift basin, *Anneleen Foubert, University of Fribourg*

Lake Tanganyika Evolutionary Biology/Paleobiology/Geobiology, *Walter Salzburger, Univ. of Basel*

14h45-15h15 Coffee

15h15-16h30:

SPECIAL TALKS

Ice core drilling activities - latest news, *Hubertus Fischer, Univ. of Bern*

Drilling for disposal of radioactive waste in Switzerland, *NAGRA*

FUTURE 'SWISSDRILLING' PROJECTS II

DOVE: Drilling Overdeepened Alpine Valleys, *Flavio Anselmetti, Univ. of Bern*

CHADRILL: Lake Chad Deep Drilling, *Daniel Ariztegui, Univ. of Geneva*

FULCRUM: Fucino Lake Chronological Record, *Daniel Ariztegui, Univ. of Geneva*

Argentine Passive Volcanic Continental Margin, *Daniel Ariztegui, Univ. of Geneva*

16h30-17h30 Aperitif Bar
